## 2 Hazards identification

- **Classification of the substance or mixture**

Skin sensitization 1 H317 May cause an allergic skin reaction.

Acute toxicity 5 H333 May be harmful if inhaled.

- **Label elements**

- **Marking elements in accordance with the GHS**  
This product is classified and labelled according to the Globally Harmonized System of Classification and Labeling of Chemicals (GHS).
- **Hazard pictograms**

GHS07

- **Signal word** *Cautious*
- **Hazard-determining components of labelling:**  
*üre tetrametilol astilen*
- **Hazard statements**  
H333 May be harmful if inhaled.  
H317 May cause an allergic skin reaction.
- **Precautionary statements**  
P101 *If a doctor's recommendation is needed: carry the product's packaging or label.*  
P102 *Keep out of reach of children.*  
P103 *Перед использованием прочитайте текст на маркировочном знаке.*

## 8 Exposure controls/personal protection

- **Additional information about design of technical facilities:**  
No further data; see item 7.
- **Control parameters**
- **Components with limit values that require monitoring at the workplace:**  
The product does not contain any significant amounts of substances with limit values that need to be monitored at the workplace.
- **Additional instructions:**  
The lists that were current at the time of compilation served as the basis.
- **Occupational health and safety requirements and measures to ensure the safety of personnel**
- **Personal protective equipment:**
- **General protective and hygienic measures:**  
Remove all contaminated clothing immediately. Wash your hands before breaks and at the end of work.
- **Respiratory protection:**  
In case of short-term contact with the substance or when exposed to a low concentration substance, use a filter device for respiratory protection. In case of intensive or prolonged contact, a self-contained respiratory protection device should be used.
- **Hand protection:**

Protective gloves (mittens).

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

- **Material of gloves**  
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.
- **Penetration time of glove material.**  
The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
- **Eye protection:** It is recommended to wear safety glasses when transfusing the product.

### 11 Toxicological information

- **Information on toxicological effects**
- **Acute toxicity:**
- **Sensitization:** Sensitization is possible through skin contact.
- **Additional toxicological information:**  
Based on the calculation method of the EU General Classification Directive for Medicinal Products in its latest (current) version, the product presents the following hazards:  
Irritating

### 12 Ecological information

- **Toxicity**
- **Aquatic toxicity:** No further relevant information available.
- **Persistence and degradability** No further relevant information available.
- **Behavior in ecological systems:**
- **Bioaccumulative potential** No further relevant information available.
- **Mobility in soil** No further relevant information available.
- **Additional ecological information:**
- **General notes:**  
Water hazard class 1 (Self-classification): slightly harmful to water  
Do not allow the product to enter groundwater, reservoirs or sewage system undiluted or in large quantities.
- **Results of PBT and vPvB assessment**
- **PBT:** Not applicable.
- **vPvB:** Not applicable.
- **Other adverse effects** No further relevant information available.

### 13 Disposal considerations

- **Waste treatment methods**
- **Recommendation:**  
Disposal together with household waste is unacceptable. Do not allow to enter the sewer.
- **Uncleaned packaging:**
- **Recommendation:**  
Disposal must be made according to official regulations.
- **Recommended cleaning products:** Water, if necessary, with the addition of cleaning agents.
